ABSTRACT

Some environmental vicious situation were proven as leading cause of aberrations in about one and a quarter century back discovered gender theory. The aberrated case by case deep study enabled fixing factors and finding initial indications which cause health hazards of parents. These health hazards were fixed as a cause by some electrolytic dis orders. In medical fraternity internal medicines are prescribed and alight gentry hunt for organic food products, which remain a distant dream due to plentiful uncertainties existing for quality, quantity and affordable availability. The objective of the present study was to device way of dampening such broadened amplitudes and overcoming the health hazards. Finding natural neutralizing material and manifestations from it proved as wow solutions. Thus, this research will be highly useful asset in creating assured health security for the previous innovation of developing child from zero to hero. The health and wellness of parents will prove as umbrella for building prosperity and creating ever surviving sustainable legacies.

Keywords: Electrolyte Disorder; Health Ailments; Food; Nutrition; Water Deficiency; Health Security; Medical Expenditures; Innovations Changing Life of World

Introduction

Human biology got developed by innovative thinking of seeing, believing and experiencing. Plentiful advancements appeared in food and drink habits, taking care of children and cares of parents viz mother and father. Aspect of development of gentry was on beyond imaginations and all things remained on the mercy of God and what happened was accepted as destined by Darwin theory of natural process. But, how human biology evolved and progressed was not in imagination. Things were based on customs and (parampara (customs). Astrology took all credits of how things developed based on position of one's grahas. All things got patternised by the astrology based suitable events, customs and general convention (paramparas). These customs created many atrocities on women and girl children as campaigned and relieving initiatives launched by Savitri Bai Phule [1]. Human biology evolved by self or by prismatism have to survive and

cope up with many adversities [2-4]. The human heart, brains, kidney and blood circulations are chartered by electrolites. The electrolytes get disbalanced causing lot of health ailments, induced by indogenic and exogenic factors, creating troublesome situations.

The aberrations in gender theory also reveled in such families dis-orders in male and female, as genetic indicator as well as health hazards of both fathers and mothers. Medical doctors prescribe interal medicines for such health ailments. Alight gentry hunted for organic foods, which remain a distant dream due to uncertainty of quality and sustainable affordable availabilities. This situation governments and scientist staked on laboratory testing and devising food quality standard safety regulatory authorities, which did not appear adequate to tackle the likely problems arising due to electrolyte based disorders. This situation lead to controlling disorders of electrolyte disbalances remained as a challenging tasks. This researcher used insight of dampening of the highly widened fluctuations between upper and

lower limits, thus the electrolytes' disorders remain in their normal regimes. This research established the health hazards appeared in both fathers and mothers, which largely get implicated by electrolytic disorders. These ailments can be overcome by application of dampening of the electrolyte disorders. The objective of the present study was to devise such dampening measure to overcome health hazards and bring transformation in to gadget for overcoming all kinds of health disorders making parental umbrella and sustainable ever surviving legacies. This will foster bring better prosperous world than the presently with lot of biological sufferings.

Materials and Method

Gender Mis Balance

About one and a quarter Century ago a scientific theory of xx-xy (female and male gender) on grass hoppers in 1902 and later for prêtre in 1905 (Singh [2]). However, the expected results of the referred gender theory got abarrated, prompting people to disbelieve and adopting their different ways of getting contented with whatever situation of gender emerged as mercy of God. The human body under indogenic and exogenic factors develop electrolyte disorders by which ove 40 health ailments arise [3,4]. This researcher carried out case by case studies of such aberrations of well acquainted cases as pondering situations of gynecological concern [5]. Further study perfected the gender theory and beyond [6] and brought the prismaticism [6]. Subsequent development was on researches which led to development of child care for creating from zero to hero [7] and again contrasting bad personality who carry out indiscriminate gun shooting in United States of America and elsewhere [8].

Health Ailments

The micro nutrients viz sodium, potassium, calcium, magnesium, chloride and Phosphorus, induce over 40 health ailments. Doctors prescribe internal medicines. In this research a new material was innovated to neutralize such electrolytes and bring in regime. This result will be brought in the result part of the study.

Substantiated Cause

The ailments were substantiated by ts occurrences during neuro therapy of a patient. Such normalizations wee instantly brought by the innovative materials.

Acqusion of Data

This researcher had brought case studies where genetic theory showed failure as expected out comes got abarrated [7]. In such case study cases all fathers as well as in mothers in the corresponding cases were sorted out for taking up further studies on linking for genetic and gender health ailments. Further, studies enabled substantiating such data sets and linking health disorders from other study Yadav, et al. [9].

Data Processing

The genetic as well gender link health ailment data were processed in convenient and understandable clear indicating for to derive comprehension by the readership. To fulfill set objective of the present study.

Innovative Solution Developed

The new material for instant overcoming of electrolite disorders were manifested for continuous set and overcoming diabetes among many.aring as gland always keeping human bodies free of such disorders.

Areas of Application of this Innovative Research

Exemplary cases were presented by wearing exemplary evidences of severe diseases such as mental depressions of inducing suicide, alzimers, cance.

Scaling Up of the Research in Vertical and Lateral Domain

The likely upscaling of the reaserch in both vertical and horizontal domain were brought in the study and presented in result and discussion part.

Surging Devastations of the Health Disorders and Appearance of the Present Solution Making Wow Innovation Facilitating Peoples Living with Wellness

It became necessary to bring references of Ardagh, 2020. that many innovations were created to make peoples daily life happy and pleaat. In this respect personal suffering of mental neuro ailments become highly disturbing and making one's life under tremendous troubles. This innovative research provides immediate relief from its root cause. Thus, this becomes a wow that overcame by the launch of sociological compaign in India [1], and scientific theory [2]. solution to escalating health devastation [Hindustan, 2024] on peoples health. This details will be presented in result part of the manuscript.

Results

Genetic Gender Link Health Ailments

Advances in xx-xy (female –male gender theory discovered in early part of 20th century provided scientifically justified development of female- male gender theory [2]. This researches took case by case deep studies of known cases and under the pondering situations [3] and could become opener of many un known facts. Studies brought prismatic balancing of the mis balances in the families those occurred due to abarrations [4]. Studies under new perfections and beyond brought many adavancements in biological sciences [5,6]. Having established substantiatingly it brought development of child care by choice and not by chance, as development of child care from zero to hero [7]. There also occurred situations of bad personalities which created worldly problem [8] and the researcher developed remedial psychology over coming problems of indiscriminate gun shooting

in the United States of America and elsewhere [9] bringing sociological control measures. Thus, the researches of this author have made tremendous advances in human biology. The data sets of (Table 1) of the previous study [7] were utilized in advancing such human biology

were redevise (under [section 2.4] to establish genetic gender linked health ailments, which also became a pre indicators of likely development of springs and health ailments of both fathers and mothers.

Table 1: Health ailments and likely devastating situation, cause an likely cure.

S.No	Category	Particulars	No of Cases		Health Hazards	Ailments		Possible Cure	Possibility of Control
						Head baldness	Migrains ang Headache		
A. Families having only male children in families									
1	I	0	1	100	-	-		Electrolite balance	Innovative solution developed
2	II	1Son	3	100	1			Electrolite balance	
3	III	2Sons	8	100	3	5	1	Electrolite balance	
4	IV	3Sons	2	100	1	1	1	Electrolite balance	
5	V	4Sons	1	100	1	1	1	Electrolite balance	
B. Families having only female children in family									
6	I	3 Daughters	1	100		PCOD		Electrolite balance	Innovative solution developed
7	II	4 Daughters	1	100		PCOD		Electrolite balance	
8	III	8 Daughters	2	100		PCOD		Electrolite balance	

Note: PCOD – polycystic ovary disease.

The data sets were realigned to facilitate readership and depicting readership comprehension (Table1), which showed that in the gender abarrated cases all the males becoming fathers had head baldness and also accompanied by migrains as well as headache. Such case in the corresponding mothers the similar health of mental disorders were found in families having three sons and more, but no girl child. Study also revealed a general problems of polycystic overy diseases [PCOD] in almost all cases in mothers having all female children without son (Table 1). Such results may be shocking but it happened in actual cases becoming cases for the pondering for gynecological concern [3]. This result becomes confirmation of liking health hazards of gene and gender linked information. The study also opened new clear cut indications which led to development of prismatic gender balancing in the misbalanced families. Thus, the researched brought new scenario of human biology and opening new door for entirely different scenario from no possibility to tremendous possibility in gender balancing and bringing ever surviving legacies for advancing natural resources of human population. There might occur lot of difference between hope and no hope of such new advances in human biology, which will be brought in the discussion part of the present study.

New insight for Bring Cures for Genetic and Gender Misbalancing Health Ailments

Having established many facts of human biology the researchers took further endeavors to find medical cures for such genetic and gender linked health disorders in both fathers and mothers. In this endeavors reference made to the Ardas 2000. Taking inspirations from such innovation a new material was innovated which can neutralize all broadened ranges of wide fluctuations betn hyper and hypo situations of electrtrolyte dis order. This material was fully tested to neutralise ny likely disorders causing dis orders of health ailments. The ailments of electrtolytes dus orders were found cause over 40 health ailments, which will get extinguish. Such fast cure will be not so fast. Thus this is an innovative measure to overcome plentiful health hazards by instant neutralization of disbalance.sans internal medicines. Like was all health ailments shown in Table 1 will equally get wipedout from the root cause.

Testing of the New Material Under the Research and Development Domain of the Present Study

The research team is fully conversant of overcoming, which occur due to any adwers impact of health ailments be by any of indogenic as well as exogenic factors and broadened amplitudes of up and down trending surges of electrolytic dis orders. This situation developed during the time when one neurotherapy treatment was on the patient was unable to move and walk. The ne innovative material was used

and instant relief was demonstrated, sans any internal medicine. It was demonstrated by the patient to instantly neutralize the severe disorder disabling movement in free walking. The results were accepted as astonishing utility and appropriateness of the new materials. The researcher will always be ready to demonstrate the use of the measure sans any internal medicines, which substantiated that there will not need of any internal medicines. Likewise, the working of the new material based measure for the ailments which occur in linking of genetic and genders. This is a wow innovation to make any likely hood of health hazards occurring due to any cause of electrolytic disorders. In all such cases a decent pleasant scenario will appear.

Special Unique Measures proving as Innovative Measures in Special Cases

The beyond studies [5,6] brought a new concept substantiating that human bodies work as a bio ecosystems where in parallel sub systems carry out work of production, consumption maintaining growths and leaving some wastes. Thus, the innovative gadget is placed at body part highly vulnerable to fluctuations in amplitude of electrolytic disorders. The newly manifested gadget has to be maintained in continuous contact with body part. This situation gets scientific support and backing and sufficiently established for its location.

Application Domains

Cases have appeared in daily new papers where sudden deaths have occurred in young gentry unexpectedly. The electrolytic imbalances cause broad variations. It is well accepted fact that pandemic Covid 19 in addition to causing lot of fatality also reduced immunity in the gentries, in general, Thus, vulnerability to broadened amplitudes of fluctuations persisted. This reduction in the immunity had caused losses irrespective of any age or any importance of gentries. This created a tremendous loss in the countries world over.

Some Purplexing Astonishing Cases of Application for Health Ailment Where No Definite Cure Existed: This section was devoted to bring appraisal of general awareness in the world gentries the gravity of problems arising due to broadening disorders of electrolytic disorders.

Tremendous Increase in Mental Ailment Patients: Studies referred by the daily news for broad dissemination to the public [10] reported results of studies conducted by scientists of Washington University for period 1999- 2021 that 1.1 billion people died due to neuro disorders, published in the Lancet Neurology Journal in 2021. Mind and brain related disorders viz strokes, migrains, Alzheimer like mental ailments of 3.4 billions. Out of this 2 billions were found affected by tension and headache and about 1 billion affected by migrains. Diabetes are the fast expanding diseases. These details become worrisome situation demanding innovative solution.

Attempting Suicide Cannot Become a Crime: In discharging a military personnel case of suicide by a mental disorder cases the Supreme court of India, New Delhi passed very appropriate decision

that such seceding attempts cannot become crime [11]. Such ailments occurring due to mental depression one loses consciousness, which is a disability and it cannot become a crime. The judgment advised inducement of sympathy towards such patients.

Developing Worrisome Disproportion in Gender Ratio of Sons and Daughters: In Ghaziabad districts, reported lot of girls die due to malnutrition resulting 902 girls per 1000 sons. In earlier reports Prayag Raj and Ghaziabad had larger no of girls birth than those of boys 1182 : 1000 [12]. The large no of deaths of girls under 6 years age resulted to disproportion of 902 girls per 1000 sons. There exist difference between opinions of doctors; some reason cause as malnutrition causing deaths and some as impacts of gender testing increasing clinics. This leads to cast doubt of deciding definite reason. One thing getting for certain that tension and worries are increasing with time, which lead to creating such uncertainties. The malnutrition can be improved to better situation and this result report will be taken up in discussion part of the study.

Vertical and Lateral Upscaling

This research has potential for vertical and lateral upscaling in expansion for application. This research will be highly useful in making work output, productivity and wellness of human and biological world. The benefits from the animal kingdom will serve better cause for all human kingdoms than it is being realized for the present. This solution proves better option than hunting for the uncertainty laden organic food. Governments need switching on such innovative measures instead of remain indulged in search of organic food production, certification and regulation. This confirms scientific wisdom will enable countries save their resources for taking up other useful ventures.

New Umbrella for Protected Self Managing Ability

There are trouble creating five situations which bring perplexing situations for any one to fail in managing the adversities. Unnecessary meetings unclear priorities Ridiculous requests, Uncertainty, Last minute panic which become hard to manoeuvre and win over them, largely induced by disorders weakening self strength and confidence. Such electrolytic disorders are eliminated by new neutralising umbrella builds capacity self manage the situation. In such failure cases have come to notice. The last minute panic has appeared in many cases causing death. Such deaths can be overcome by building self managing capability.

New Insurance for Global Health Security

The afore brought out research and development enabled this summary figure depicting entire aspects, enriched with capacity built activated to produce tremendous benefits which can be partnership cooperation for bringing better healthy all time wellness equipped biological world. This innovation brings easy way and keep healthy long living as Godly blessing

Discussion

All research and developments presented here were further ratified for its convincing substantiations and smoothereing any angularity that might appear in chartering its worldwide acceptability.

The Development of Electrolytic Disbalance is Essential a Natural Bio Process

Electrolyte is very important bio factor maintaining proper functioning of body organs. This bio-factor is chartered by both indogenic and exogenic governing situations. The governing bio factors broaden amplitudes of fluctuations affecting different homeo stasis indicating medical situations and disorders. This situation disturbs homeostasis of bodies, which trigger several health ailments. Medical fraternities prescribe internal medicines, which is highly subjected to inaccessibility of expert advisory, availability of original medicines and affordable costs. It becomes highly non affordable and difficult necessary facility for meeting huge demands of healthcares. It remained a challenging task to accomplish the compulsory task related to health and wellness of global gentry.

The Electrolytic did Balance is Caused by Indogenic and Exo Genic Factors

The electrolytic disorders causing health disorders can occur at any time due to shortage of food, water, nutrition, climate change causing heat, cold, rain as well as wind tides etc. As such it may be difficult to ascertain the cause, which become a non feasible task [12]. This becomes a complex situation and worldly bio world remain indulged throughout the life resolving such issues. These facts were not adequately understood, which is again appearing a new challenging frontier.

The Internal Medical is not Sufficient to Contribute its Global Need

The internal medicines are not adequate to cater the global needs of maintaining homeostasis of bio world. This implicates pressing need for finding any innovative measure to resolve the issue in biology and entire bio world.

Neutralization is the Most Innovative Development Surpassing all Worldly Developments

Neutalisation of the electrolytic disorder following inspiration from reference [13] created new identification of inert material to neutralise it with complete extinction and instan makig one get instant relief from the healt disorders [14-17] This can be made highly affordable and brought as a feasible solution fulfilling the challenges.

The New Innovation Proves as an Alternative to the Hunt for Organic Food

Inabsence of such innovations alight gentry hunt for organic food which again remains with limitation of quality, adequacies and affordable price of suitable food commodities. Governments incur lot of infrastructural facility building expenditures in establishing quality checkups, exercising regulations and creating freedom from any scam that might occur at any stage. The productivity of organic system is not adequate to fulfill huge global demands. This researcher shorted out many limitations of organic foods' frodution to consumption. In this complexity new innovation brings excellent solution free from all limitations.

This Research Will Overcome All Shortages of Nutrition, Water, Resh Airas Ell Overcome Any Exigency Which Become Fatal Under Many Situarion

The preent innovation will overcome all strocitie of shortages and quality inaduacies, insufficiencie that might com from interal as well as xternal factos cusing lot of problems.

This Discovery Builds Capacity Setting Healthy and Prosperous Own Capacity

This innovative development enhances capacity building of physical, mental and neurological aspects was very well depicted in (Figure 1). Thus, it resolves many long time existing neurological disorders. Good mental situations will save patients from getting in to depressions; the patients will come senses to care of one self and think for betterment of one's dependents.

Relevance, Effectiveness, Efficient Important and Sustainable (REEIS)

This innovative research is highly relevant, it is highly effective and efficient, important andustainable. Thus, this it becomes a wow solution of prime importance, accomplishing legendary saying," Jaan hai Jahan hai" (When one is alive theres is world and beyond it there is nothing).

Streagth, Opportunity, Weaknes and Threat (Sowt)Analysis

This research is highly scientific and backed by scientific facts, hence it is very strong. This research brought a band which provides lot of opportunity (Figure 2). It is free from any threat and again feree from any weakness. It is going to bring new healthy and prosperous bioworld.

Figure 1: Building umbrella protected capacity for self-managing personality.

Figure 2: New band of bringing global health security.

Conclusion

This study enabled linking genetic cum gender related health hazards. As such many troubles emerge and in many cases fathers suffered from head baldness, headache and migraines, on the other hand mothers suffered from PCOD disorders, It has come that there occur electrolytic disorders. In this innovative study a new natural material was searched which produced astonishing results of dampening the broad amplitudes of hyper and hypo situations of elements namely

sodium, potassium, calcium, magnesium, chlorite and phosphorus. The electrolytic disorders were totally instantly neutralised. In order to provide all time protection for getting free of such disorders a manifested wearable gadget was developed. This gadget gets used by all human beings to protect from any disorders. This is also useful in building immunity enforced personality creating health security; covering time prior to birth till one remains alive. Thus, this result proved as a wow innovation for creating a healthy world with trouble-free long life.

Declaration no Conflict of Interest

It is declared by the authors that there existed no any conflict of interest, be it for authorships or for any financial support calm.
